Plant Science, 82 (1992) 261–263
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 82 (1992)

Acer pseudoplatanus, tonoplast ATPase activity, plasma membrane ATPase activity, 135
ADPglucose pyrophosphorylase, endosperm, Q-enzyme (starch branching enzyme), rice, starch, starch synthase, 15
Affinity chromatography, affinity sorbent, lectins, galactose, cell wall composition, cell wall ghost, cell wall porosity, 29
Affinity sorbent, affinity chromatography, lectins, galactose, cell wall composition, cell wall ghost, cell wall porosity, 29
Agrobacterium tumefaciens, potato, GUS gene, 109
Alcohol dehydrogenase-1, *Triticum* species, evolutionary protein modifications, 71
Antibodies, *Saprolegnia monoica*, 1,3-β-glucan synthase, lectins, 145
Apomictic grass, *Paspalum dilatatum*, embryogenic suspension, pretreated cells, protoplast culture, plant regeneration, 219
Apomictic grass, *Paspalum dilatatum* Poir, somatic embryogenesis, plant regeneration, 213
Apple, calmodulin, CaM, gene cloning, *Malus*, 201
Asparagus cooperi, tissue culture, explant type, callus, organogenesis, plant regeneration, photoperiod, cytology, 119
ATPase activity, plasma membrane, two-phase polymer system, phosphotungstic acid-chromic acid, *Chara*, 187

Beta vulgaris L., vacuoles, vacuole isolation, vacuole stability, vacuole populations, parenchyma cells, 251

Callus, *Asparagus cooperi*, tissue culture, explant type, organogenesis, plant regeneration, photoperiod, cytology, 119
Calmodulin, apple, CaM, gene cloning, *Malus*, 201
CaM, apple, calmodulin, gene cloning, *Malus*, 201
Carotenoids, chlorophyll, galactolipids, fatty acids, soluble protein, 167
Cecropin SB47, plant protoplasts, lethal concentration, 101
Cell wall composition, affinity chromatography, affinity sorbent, lectins, galactose, cell wall ghost, cell wall porosity, 29
Cell wall ghost, affinity chromatography, affinity sorbent, lectins, galactose, cell wall composition, cell wall porosity, 29
Cell wall porosity, affinity chromatography, affinity sorbent, lectins, galactose, cell wall composition, cell wall ghost, 29
Chara, plasma membrane, two-phase polymer system, ATPase activity, phosphotungstic acid-chromic acid, 187
Chlorophyll, carotenoids, galactolipids, fatty acids, soluble protein, 167
Cicer arietinum L. cv 'Castellana', cytokinins, metabolism, enzymatic activity, seed reserves, seed germination, 161
Conductivity, embryogenic suspension cultures, growth assay, osmolarity, *Picea glauca-engelmannii*, *Picea mariana*, 227
Cyanide resistant respiration, *Euglena gracilis*, cytochrome *o*, 37
Cytochrome *o*, Euglena gracilis, cyanide resistant respiration, 37
Cytokinins, *Cicer arietinum* L. cv 'Castellana', metabolism, enzymatic activity, seed reserves, seed germination, 161
Cytology, *Asparagus cooperi*, tissue culture, explant type, callus, organogenesis, plant regeneration, photoperiod, 119

Daucus carota, tobacco mosaic virus, plant cell culture, inhibitor, resistance, *Nicotiana tabacum*, 243
Dedifferentiation/differentiation, transformation, kanamycin, *Nicotiana tabacum*, gene stability, 193
Digitalis lanata, embryogenesis (somatic), in vivo and in vitro protein synthesis, leaf embryogenesis abundant transcripts, transcriptional and post transcriptional control, *Nicotiana plumbaginifolia*, 47

Electroporation, sugarcane, protoplasts, stable transformation, 81
Embryogenesis (somatic), in vivo and in vitro protein synthesis, leaf embryogenesis abundant transcripts, transcriptional and post transcriptional control, *Digitalis lanata*, *Nicotiana plumbaginifolia*, 47
Embryogenic suspension, *Paspalum dilatatum*, apomictic grass, pretreated cells, protoplast culture, plant regeneration, 219
Embryogenic suspension cultures, growth assay, osmolarity, conductivity, *Picea glauca-engelmannii*, *Picea mariana*, 227
Embryo mutant, *Oryza sativa*, shoot organization, seedling, rice, 91
Endosperm, ADPglucose pyrophosphorylase, Q-enzyme (starch branching enzyme), rice, starch, starch synthase, 15
Enzymatic activity, *Cicer arietinum* L. cv 'Castellana', cytokinins, metabolism, seed reserves, seed germination, 161
Ethylene, lipoxygenase, wounding, *Secale cereale*, 155
Euglena gracilis, cyanide resistant respiration, cytochrome *o*, 37
Evolutionary protein modifications, alcohol dehydrogenase-1, *Triticum* species, 71
Explant type, *Asparagus cooperi*, tissue culture, callus, organogenesis, plant regeneration, photoperiod, cytology, 119

Fatty acids, carotenoids, chlorophyll, galactolipids, soluble protein, 167
Firefly luciferase, *rbc*S promoter, soybean, transgenic tobacco, tissue-specificity, light regulation, 59

Galactolipids, carotenoids, chlorophyll, fatty acids, soluble protein, 167
Galactose, affinity chromatography, affinity sorbent, lectins, cell wall composition, cell wall ghost, cell wall porosity, 29

Gene cloning, apple, calmodulin, CaM, *Malus*, 201
Gene stability, transformation, kanamycin, *Nicotiana tabacum*, dedifferentiation/differentiation, 193
Germination, malate synthase, soybean, *Glycine max*, 21
1,3-β-Glucan synthase, *Saprolegnia monoica*, lectins, antibodies, 145
Glutamine synthetase, root nudules, *Phaseolus acutifolius* Gray, tepary bean, isozymes, symbiotic nitrogen fixation, 179
Glycine max, malate synthase, soybean, germination, 21
Growth assay, embryogenic suspension cultures, osmolarity, conductivity, *Picea glauca-engelmannii*, *Picea mariana*, 227
GUS gene, potato, *Agrobacterium tumefaciens*, 109

Inhibitor, tobacco mosaic virus, plant cell culture, resistance, *Nicotiana tabacum*, *Daucus carota*, 243
In vivo and in vitro protein synthesis, embryogenesis (somatic), leaf embryogenesis abundant transcripts, transcriptional and post transcriptional control, *Digitalis lanata*, *Nicotiana plumbaginifolia*, 47
Isozymes, glutamine synthetase, root nudules, *Phaseolus acutifolius* Gray, tepary bean, symbiotic nitrogen fixation, 179
Isozyme analysis, *Triticum aestivum*, somatic embryogenesis, 235

Kanamycin, transformation, *Nicotiana tabacum*, gene stability, dedifferentiation/differentiation, 193

Leaf embryogenesis abundant transcripts, embryogenesis (somatic), in vivo and in vitro protein synthesis, transcriptional and post transcriptional control, *Digitalis lanata*, *Nicotiana plumbaginifolia*, 47
Lectins, affinity chromatography, affinity sorbent, galactose, cell wall composition, cell wall ghost, cell wall porosity, 29
Lectins, *Saprolegnia monoica*, 1,3-β-glucan synthase, antibodies, 145
Legumes, *Pisum sativum* L., seed albumins, perchloric acid extraction, urea/acetic acid electrophoresis, seed tissue differentiation, 1
Lethal concentration, cecropin SB47, plant protoplasts, 101
Light regulation, *rbc*S promoter, soybean, transgenic tobacco, tissue-specificity, firefly luciferase, 59
Lipoxygenase, ethylene, wounding, *Secale cereale*, 155

Malate synthase, soybean, *Glycine max*, germination, 21
Malus, apple, calmodulin, CaM, gene cloning, 201
Metabolism, *Cicer arietinum* L. cv 'Castellana', cytokinins, enzymatic activity, seed reserves, seed germination, 161

Nicotiana plumbaginifolia, embryogenesis (somatic), in vivo and in vitro protein synthesis, leaf embryogenesis abundant transcripts, transcriptional and post transcriptional control, *Digitalis lanata*, 47
Nicotiana tabacum, tobacco mosaic virus, plant cell culture, inhibitor, resistance, *Daucus carota*, 243
Nicotiana tabacum, transformation, kanamycin, gene stability, dedifferentiation/differentiation, 193

Organogenesis, *Asparagus cooperi*, tissue culture, explant type, callus, plant regeneration, photoperiod, cytology, 119
Oryza sativa, embryo mutant, shoot organization, seedling, rice, 91
Osmolarity, embryogenic suspension cultures, growth assay, conductivity, *Picea glauca-engelmannii*, *Picea mariana*, 227

Parenchyma cells, vacuoles, *Beta vulgaris* L., vacuole isolation, vacuole stability, vacuole populations, 251
Paspalum dilatatum, apomictic grass, embryogenic suspension, pretreated cells, protoplast culture, plant regeneration, 219
Paspalum dilatatum Poir, apomictic grass, somatic embryogenesis, plant regeneration, 213
Pathogenesis related (PR) proteins, protein localisation, ribulose-1,5-bisphosphate carboxylase-oxygenase, tissue printing, tobacco, 125
Perchloric acid extraction, *Pisum sativum* L., legumes, seed albumins, urea/acetic acid electrophoresis, seed tissue differentiation, 1
Phaseolus acutifolius Gray, glutamine synthetase, root nudules, tepary bean, isozymes, symbiotic nitrogen fixation, 179
Phosphotungstic acid-chromic acid, plasma membrane, two-phase polymer system, ATPase activity, *Chara*, 187
Photoperiod, *Asparagus cooperi*, tissue culture, explant type, callus, organogenesis, plant regeneration, cytology, 119
Picea glauca-engelmannii, embryogenic, suspension cultures, growth assay, osmolarity, conductivity, *Picea mariana*, 227
Picea mariana, embryogenic suspension cultures, growth assay, osmolarity, conductivity, *Picea glauca-engelmannii*, 227
Pisum sativum L., legumes, seed albumins, perchloric acid extraction, urea/acetic acid electrophoresis, seed tissue differentiation, 1
Plant cell culture, tobacco mosaic virus, inhibitor, resistance, *Nicotiana tabacum*, *Daucus carota*, 243
Plant protoplasts, cecropin SB47, lethal concentration, 101
Plant regeneration, *Asparagus cooperi*, tissue culture, explant type, callus, organogenesis, photoperiod, cytology, 119
Plant regeneration, *Paspalum dilatatum*, apomictic grass, embryogenic suspension, pretreated cells, protoplast culture, 219
Plant regeneration, *Paspalum dilatatum* Poir, apomictic grass, somatic embryogenesis, 213
Plasma membrane, two-phase polymer system, ATPase activity, phosphotungstic, acid-chromic acid, *Chara*, 187
Plasma membrane ATPase activity, *Acer pseudoplatanus*, tonoplast ATPase activity, 135
Potato, *Agrobacterium tumefaciens*, GUS gene, 109
Pretreated cells, *Paspalum dilatatum*, apomictic grass, embryogenic suspension, protoplast culture, plant regeneration, 219
Protein localisation, pathogenesis related (PR) proteins, ribulose-1,5-bisphosphate carboxylase-oxygenase, tissue printing, tobacco, 125
Protoplasts, sugarcane, electroporation, stable transformation, 81
Protoplast culture, *Paspalum dilatatum*, apomictic grass, embryogenic suspension, pretreated cells, plant regeneration, 219

Q-enzyme (starch branching enzyme), ADPglucose pyrophosphorylase, endosperm, rice, starch, starch synthase, 15

*rbc*S promoter, soybean, transgenic tobacco, tissue-specificity, light regulation, firefly luciferase, 59
Resistance, tobacco mosaic virus, plant cell culture, inhibitor, *Nicotiana tabacum*, *Daucus carota*, 243
Ribulose-1,5-bisphosphate carboxylase-oxygenase, pathogenesis related (PR) proteins, protein localisation, tissue printing, tobacco, 125
Rice, ADPglucose pyrophosphorylase, endosperm, Q-enzyme (starch branching enzyme), starch, starch synthase, 15
Rice, *Oryza sativa*, embryo mutant, shoot organization, seedling, 91
Root nudules, glutamine synthetase, *Phaseolus acutifolius* Gray, tepary bean, isozymes, symbiotic nitrogen fixation, 179

Saprolegnia monoica, 1,3-β-glucan synthase, lectins, antibodies, 145
Secale cereale, lipoxygenase, ethylene, wounding, 155
Seedling, *Oryza sativa*, embryo mutant, shoot organization, rice, 91
Seed albumins, *Pisum sativum* L., legumes, perchloric acid extraction, urea/acetic acid electrophoresis, seed tissue differentiation, 1
Seed germination, *Cicer arietinum* L. cv 'Castellana', cytokinins, metabolism, enzymatic activity, seed reserves, 161
Seed reserves, *Cicer arietinum* L. cv 'Castellana', cytokinins, metabolism, enzymatic activity, seed germination, 161
Seed tissue differentiation, *Pisum sativum* L., legumes, seed albumins, perchloric acid extraction, urea/acetic acid electrophoresis, 1
Shoot organization, *Oryza sativa*, embryo mutant, seedling, rice, 91
Soluble protein, carotenoids, chlorophyll, galactolipids, fatty acids, 167
Somatic embryogenesis, *Paspalum dilatatum* Poir, apomictic grass, plant regeneration, 213
Somatic embryogenesis, *Triticum aestivum*, isozyme analysis, 235
Soybean, malate synthase, *Glycine max*, germination, 21
Soybean, *rbc*S promoter, transgenic tobacco, tissue-specificity, light regulation, firefly luciferase, 59
Stable transformation, sugarcane, electroporation, protoplasts, 81
Starch, ADPglucose pyrophosphorylase, endosperm, Q-enzyme (starch branching enzyme), rice, starch synthase, 15
Starch synthase, ADPglucose pyrophosphorylase, endosperm, Q-enzyme (starch branching enzyme), rice, starch, 15
Sugarcane, electroporation, protoplasts, stable transformation, 81
Symbiotic nitrogen fixation, glutamine synthetase, root nudules, *Phaseolus acutifolius* Gray, tepary bean, isozymes, 179

Tepary bean, glutamine synthetase, root nudules, *Phaseolus acutifolius* Gray, isozymes, symbiotic nitrogen fixation, 179
Tissue-specificity, *rbc*S promoter, soybean, transgenic tobacco, light regulation, firefly luciferase, 59
Tissue culture, *Asparagus cooperi*, explant type, callus, organogenesis, plant regeneration, photoperiod, cytology, 119
Tissue printing, pathogenesis related (PR) proteins, protein localisation, ribulose-1,5-bisphosphate carboxylase-oxygenase, tobacco, 125
Tobacco, pathogenesis related (PR) proteins, protein localisation, ribulose-1,5-bisphosphate carboxylase-oxygenase, tissue printing, 125
Tobacco mosaic virus, plant cell culture, inhibitor, resistance, *Nicotiana tabacum*, *Daucus carota*, 243
Tonoplast ATPase activity, *Acer pseudoplatanus*, plasma membrane ATPase activity, 135
Transcriptional and post transcriptional control, embryogenesis (somatic), in vivo and in vitro protein synthesis, leaf embryogenesis abundant transcripts, *Digitalis lanata*, *Nicotiana plumbaginifolia*, 47
Transformation, kanamycin, *Nicotiana tabacum*, gene stability, dedifferentiation/differentiation, 193
Transgenic tobacco, *rbc*S promoter, soybean, tissue-specificity, light regulation, firefly luciferase, 59
Triticum aestivum, somatic embryogenesis, isozyme analysis, 235
Triticum species, alcohol dehydrogenase-1, evolutionary protein modifications, 71
Two-phase polymer system, plasma membrane, ATPase activity, phosphotungstic acid-chromic acid, *Chara*, 187

Urea/acetic acid electrophoresis, *Pisum sativum* L., legumes, seed albumins, perchloric acid extraction, seed tissue differentiation, 1

Vacuoles, *Beta vulgaris* L., vacuole isolation, vacuole stability, vacuole populations, parenchyma cells, 251
Vacuole isolation, vacuoles, *Beta vulgaris* L., vacuole stability, vacuole populations, parenchyma cells, 251
Vacuole populations, vacuoles, *Beta vulgaris* L., vacuole isolation, vacuole stability, parenchyma cells, 251
Vacuole stability, vacuoles, *Beta vulgaris* L., vacuole isolation, vacuole populations, parenchyma cells, 251

Wounding, lipoxygenase, ethylene, *Secale cereale*, 155
